System & Soul™ MANIFESTO

WE BELIEVE IN BUSINESS

Small businesses represent the heartbeat of our communities. As business owners, we see opportunities, needs, and desires—then we find ways to not only meet them, but also create value through them.

WE BELIEVE IN A SYSTEM

Businesses that invest in a defined system of operation can grow faster and accelerate value creation.

With great organization, businesses can better invest in their people, avoid solving the same problems over and over, delegate responsibilities, and stay hyper-focused on what matters most.

WE BELIEVE IN A SOUL

Every business is born with a soul. Some are oppressed, some are neglected, and some of the best bring freedom.

What most business owners don't know is that the soul of the company can be crafted, engineered, and equipped for success.

Nothing fuels competitive advantage like a soul that is alive and in sync with its design.

"I've known Chris for a long time. I just trust him so much. He's been enormously helpful to me and guiding my organization. For me, that soul piece is just so important and relevant, especially for the times right now and I just want to be a part of it!"

- System & Soul Coach Lee Nasehi

"All of these business frameworks get focused on the structure side, but what they're really missing is the soul piece.
